

Save a house, have a detector

Well, I walk into a room
and see one high up on the wall
or in the hall, or maybe even way up high in that bathroom stall
and if I hear that little chirp sending out that sound
the battery has run down
And this detector, aint never going to be the same

Chorus

Then I pick up a new battery
and I put it in the back
It makes a lot of noise
Cause it's under
a smokey attack
Sniffin' all of that bad air
so that you and I don't have too
Everybody says
Save house, have a detector
Everybody says
Save a house, have a detector

Well I don't really care about nothing
Cept eating and my sleeping
till I hear that beep beep beeping
Knees on the ground
Then I start my crawling
with my face close to the floor
and with my hand I feel the door
and Out I go to the meeting place next door

Chorus

Cause I pick up a new battery
and I put it in the back
It makes a lot of noise
Cause it's under
a smokey attack
Sniffin' all that bad air
so that you and I don't have too
Everybody says
Save house, have a detector
Everybody says
Save a house, have a detector

When that detector sounds
I am on the ground
And on my knees
Heading for that good ole bedroom door
I am crawling low
underneath the smoke
Down on the floor where all the good air blows
Following my safety plan just like at the clown shows

But my evaluation
of my current situation
had me begging for extrication
from this fire
So I went to my ole window
and climbed out of it nice and slow
And over to the meeting place where all the cool kids go
And we wait here for help.

Chorus

Cause I pick up a new battery
and I put it in the back
It makes a lot of noise
Cause it's under
a smokey attack
Sniffin' all that bad air
so that you and I don't have too
everybody says
Save house, have a detector
Everybody says
Save a house, have a detector

What? What?
Save a house, Have a detector
Everbody says
Save a house, Have a detector
